Thanks, and just got your message. Too bad that JB won't be able to see you in person, and I would've liked to see you, too.

I'll plan on bringing the talking points to share with them in person. The WQS folks would really like us not to share anything in writing, so we can always discuss tomorrow. But at a minimum, I'll have a hard copy to work off of.

Lastly, Dan isn't going to be able to make tomorrow's briefing, and Christine is a maybe to probably. Dave C hasn't accepted, but I'm going to ask Bella to accept for him. So hopefully, we'll at least have Christine. If not, our group can at least connect, as JB, Dru, and John haven't been involved in the bigger picture conversations.

Thanks! - Jenny

Alan and Jeff,

Attached is the current working draft of the Board of Forestry June 23 workshop on the riparian rule analysis. My understanding is that Topic 2 will be the part that includes EPA and NOAA (see Josh's message below). Josh Seeds, DEQ, is taking the lead on this part and I believe their presentation will be similar if not the same as the presentation at the EQC meeting on June 19 .

I will be sending out an agenda with the public notice later this week (Friday). If you know who will be present I will add those names. Otherwise, I will just list EPA and NOAA on the agenda for now.

Thanks, Peter

Peter,

I don't really have any edits. I think this looks good. The material I present will be similar to what I brought to the May14th meeting with some additional information intended to answer some of the

questions which I received. I would check directly with Alan at EPA and Jeff at NOAA-Fisheries with regard to who will be attending from those agencies. We'll want them to be available to answer questions and address their roles and responsibilities with regard to water quality standards, as well as giving their perspective on what a temp standard need to pass consultation and approval. Gene and I were thinking that they could sit at the table with us to be available, and then give their info and perspective at the end of our topic.

Dave Jepsen and I are working on a cooperative DEQ/ODFW presentation. We'll be integrating our material together.

Thanks,

Josh

Josh,

Thanks for the update. I plan to attend the EQC meeting. I would be glad to answer specific forestry questions should they come up, but it seems the presentation is more focused on the water quality standards and their justification.

In terms of the BOF workshop, I need to send out the agenda with the press release on the meeting.

Please review Topic 2, in particular the bullets that describe what will be covered. Also are the names decided yet in terms of who will be presenting? If possible, please send edits by the end of Wed. 6/4.

Thanks, Peter

I meant to send this on Friday but apparently did not. Sorry about that. Read on...

Thanks, Peter. Here is the draft I am sending to our EQC assistant. Jennifer Wigal did a lot of rearranging, but the content is the same. I used your edits but there is a caveat about adding "urban" when discussing NPS load allocations; reason is below.

FYI, larger urban areas are considered a point source, even stormwater, since it is usually conveyed in pipes, etc, but smaller urban areas are nonpoint sources. Rural residential is lumped in with ag as far as jurisdiction goes. I use the North Coast Regional Water Board information from California because it is the southern part of our ecoregion and similar to SW Oregon. The structure of the Cologne-Porter Act puts much of the authority that we would have at the state level into the regional water boards.

Have a nice weekend.

Thanks,

Josh

Josh,

Here are my comments for your consideration. There is nothing in the report that conflicts with our understanding of the standards or rules. Thanks for the chance for input.

Peter, do you have any comments on that draft staff report for the EQC? I need to get it to our EQC Assistant ASAP.

Thanks,

Josh

Let's try this again with the correct version. Toss the one that I just sent.

Good catch, Aron.

Thanks,

Josh

Peter, Jennifer, and Wendy,

Attached for your review and comment is the draft staff report for our water quality (particularly temperature) info item for the Commission at the June meeting. The sooner we can get this to Stephanie the better, so I would appreciate it greatly if you all are able to do a quick turnaround.

Thanks,

Josh

Suggested edits in track changes in the attached.

Deb and Aron - please review and provide comment to Josh

Next step after revision is to send the next draft to Peter, Jennifer, and Wendy

Let me know if you have questions/comments

thanks

Gene

Subject: EQC staff report

Gene, and Ryan,

Here is the draft staff report for the EQC meeting in June. This will form the basis for our presentation and content for the June 23rd BOF workshop. It should cover some of the points we discussed at our meetings the last couple of days, but not all. Comments, edits, etc.

Thanks,

Josh
